Features

Simple system

- This Queuing System can be used as a simple stand alone system.
- No computer required except for setup and name changes.

- Setup is performed on an easy to use web page.
- Bright OLED display is easy to read even at steep angles.
- Stations may be ordered in any order using the virtual station numbering feature.
- Up to 4 lists of names may be stored in the system.
- Each list can have up to 64 names.
- Just select the desired list and make it the live list.

Full featured system

- Connect this system to your Internal network and take advantage of the advanced features.
- The system has a full built-in web server with web pages to access all features.
- Online help provides easy access to setup instructions.
- Show the request to speak list on as many computers as you desire.
- Virtual stations may be setup at locations that do not have physical stations.
- As long as you have and Internet connection or VPN, the system can be controlled from anywhere in the world.
- A request to speak console permits a clerk or moderator to have full control of the request to speak system.
- A electronic voting console permits a clerk or moderator to have full control of the electronic voting system.
- Show the vote results on your computer(s) or on large screen display connected to your computer.
